

OPEN Forum: Domiciliary Care

You are invited to give your views about domiciliary care services provided by private sector organisations contracted by Stoke-on-Trent City Council.

This care and support service is delivered in people's own homes, and is sometimes referred to as 'Home Care'. During visits, carers deliver a range of services, including personal care, help with medication and preparing meals.

We want your feedback about what are the most important things to consider for someone who receives domiciliary care, now and in the future.
